**Devotion and Corrosion** Michael Warren Lucas, High Speed Madness, with Love at the Wheel Love. The most overloaded word in our language. Love of your mate, love of pets, of parents and children and friends, all different things. We spend our last breath sharing our love. For love, we break not just the law but ourselves. Love is pure devotion, and pure corrosion. Love propels these stories. Thrillers and fantasies, science fiction and historicals. Love chained by brain implants and little old ladies who should have been left undisturbed. Love strong enough to unravel the universe, with the knowledge to do it. Minuscule love wiggling its whiskers against your cheek. Trapped children freeing themselves through love of the incomprehensible. Love of art and family and another person, the kind of love that violates museums and gnaws Semtex. Selected from a decade of the author's work, these eleven tales affirm the power of love—at knifepoint. "Each story is Hieronymus Bosch writing a love letter to Charlie Brown's little red-haired girl now grown and so weary she aches." - ZZ Claybourne

**Gunslinger to the Galaxy** Joe Vasicek,2018-12-12 My name is Jane Kletchka, and I'm here to set the record straight. Jane Kletchka here. By now, I'm sure you've heard how my dear husband Sam saved the Gorinal star cluster and stopped the Immortals from throwing the galaxy into chaos. Unfortunately, he didn't thwart their plans; he only accelerated them. As the galaxy fell into chaos, Earthfleet commissioned us to find out what was happening before Earth became the next planet to fall. Little did we know, it wasn't just the Immortals we had to contend with, but an enemy from beyond the Milky Way. I never expected to be out there on my own. Actually, that's not true: I still had Tarak the telepath, Imutab the empath-shapeshifter, and an unexpected stowaway. But after Sam went MIA, the full weight of the mission—and perhaps the fate of the galaxy itself—fell on me. This is my story. Hang on for the ride.

**The Future of Aging** ,2010-07-28 Just as the health costs of aging threaten to bankrupt developed countries, this book makes the scientific case that a biological bailout could be on the way, and that human aging can be different in the future than it is today. Here 40 authors argue how our improving understanding of the biology of aging and selected technologies should enable the successful use of many different and complementary methods for ameliorating aging, and why such interventions are appropriate based on our current historical, anthropological, philosophical, ethical, evolutionary, and biological context. Challenging concepts are presented together with in-depth reviews and paradigm-breaking proposals that collectively illustrate the potential for changing aging as never before. The proposals extend from today to a future many decades from now in which the control of aging may become effectively complete. Examples include sirtuin-modulating pills, new concepts for attacking cardiovascular disease and cancer, mitochondrial rejuvenation, stem cell therapies and regeneration, tissue reconstruction, telomere maintenance, prevention of immunosenescence, extracellular rejuvenation, artificial DNA repair, and full deployment of nanotechnology. The Future of Aging will make you think about aging differently and is a challenge to all of us to open our eyes to the future therapeutic potential of biogerontology.
