New York City Zoos and Aquarium Joan Scheier,2006-02-22 Tour the zoos and aquarium that came to be featured favorites in New York tourism and recreation. Situated within the five boroughs of New York City are five zoos and one aquarium. New York City Zoos and Aquarium chronicles the establishment of the Central Park Zoo, the Bronx Zoo, the Prospect Park Zoo, the Queens Zoo, the Staten Island Zoo, and the New York Aquarium. Popular children's zoos are also featured. The city's first zoo opened in Central Park in the 1850s, while the newest zoo opened in Queens after the 1964 World's Fair. While each one of these facilities has many similarities, they all have their own unique attributes. All of the facilities are focused on education, conservation, and the care of the animals that now reside in natural habitats.

Dear Bronx Zoo Joyce Altman,1992-03 Describes the activities at the Bronx Zoo and introduces the animals on display.

These Precious Days Ann Patchett,2021 The international bestselling writer Ann Patchett has been described as 'one of the foremost chroniclers of the burdens of emotional inventory and its central place in American lives' and 'a master of her art' (Observer). In her new collection, with her trademark blend of wryness, intelligence and wisdom, she explores family, friendship, marriage, failure, success - and how all these forces have shaped her as a writer. Ranging from the personal - her portrait in triptych of the three men she called her fathers, to unexpectedly falling into a friendship with Tom Hanks, to how to answer when someone asks why you don't have children - to the sublime - exploring the Harvard Museum of Natural History before its doors open, or the perfection to be found on a single page of Eudora Welty - each essay shows Patchett's strikingly original perspective, and the magical sleight of hand with which she transforms the particular into the universal. Illuminating, penetrating, funny and generous, *These Precious Days* is joyful time spent in the company of one of our greatest living authors.

Pirate Life Michael Teitelbaum,2007-08 Presents a brief history of pirates, as well as discussing life onboard a pirate ship, pirate lingo, and the weapons they used.

The Secret Byron Preiss,2016-10-05 The tale begins over three-hundred years ago, when the Fair People—the goblins, fairies, dragons, and other fabled and fantastic creatures of a dozen lands—fled the Old World for the New, seeking haven from the ways of Man. With them came their precious jewels: diamonds, rubies, emeralds, pearls... But then the Fair People vanished, taking with them their twelve fabulous treasures. And they remained hidden until now... Across North America, these twelve treasures, over ten-thousand dollars in precious jewels, are buried. The key to finding each can be found within the twelve full color paintings and verses of *The Secret*. Yet *The Secret* is much more than that. At long last, you can learn not only the whereabouts of the Fair People's treasure, but also the modern forms and hiding places of their descendants: the Toll Trolls, Maitre D'eamons, Elf Alphas, Tupperwerewolves, Freudian Sylphs, Culture Vultures, West Ghosts and other delightful creatures in the world around us. *The Secret* is a field guide to them all. Many armchair treasure hunt books have been published over the years, most notably *Masquerade* (1979) by British artist Kit Williams. *Masquerade* promised a jewel-encrusted golden hare to the first person to unravel the riddle that Williams cleverly hid in his art. In 1982, while everyone in Britain was still madly digging up hedgerows and pastures in search of the golden hare, *The Secret: A Treasure Hunt* was

published in America. The previous year, author and publisher Byron Preiss had traveled to 12 locations in the continental U.S. (and possibly Canada) to secretly bury a dozen ceramic casques. Each casque contained a small key that could be redeemed for one of 12 jewels Preiss kept in a safe deposit box in New York. The key to finding the casques was to match one of 12 paintings to one of 12 poetic verses, solve the resulting riddle, and start digging. Since 1982, only two of the 12 casques have been recovered. The first was located in Grant Park, Chicago, in 1984 by a group of students. The second was unearthed in 2004 in Cleveland by two members of the Quest4Treasure forum. Preiss was killed in an auto accident in the summer of 2005, but the hunt for his casques continues.

Resources for Teaching Elementary School Science National Science Resources Center of the National Academy of Sciences and the Smithsonian Institution, 1996-04-28 What activities might a teacher use to help children explore the life cycle of butterflies? What does a science teacher need to conduct a leaf safari for students? Where can children safely enjoy hands-on experience with life in an estuary? Selecting resources to teach elementary school science can be confusing and difficult, but few decisions have greater impact on the effectiveness of science teaching. Educators will find a wealth of information and expert guidance to meet this need in *Resources for Teaching Elementary School Science*. A completely revised edition of the best-selling resource guide *Science for Children: Resources for Teachers*, this new book is an annotated guide to hands-on, inquiry-centered curriculum materials and sources of help in teaching science from kindergarten through sixth grade. (Companion volumes for middle and high school are planned.) The guide annotates about 350 curriculum packages, describing the activities involved and what students learn. Each annotation lists recommended grade levels, accompanying materials and kits or suggested equipment, and ordering information. These 400 entries were reviewed by both educators and scientists to ensure that they are accurate and current and offer students the opportunity to: Ask questions and find their own answers. Experiment productively. Develop patience, persistence, and confidence in their own ability to solve real problems. The entries in the curriculum section are grouped by scientific area—Life Science, Earth Science, Physical Science, and Multidisciplinary and Applied Science—and by type—core materials, supplementary materials, and science activity books. Additionally, a section of references for teachers provides annotated listings of books about science and teaching, directories and guides to science trade books, and magazines that will help teachers enhance their students' science education. *Resources for Teaching Elementary School Science* also lists by region and state about 600 science centers, museums, and zoos where teachers can take students for interactive science experiences. Annotations highlight almost 300 facilities that make significant efforts to help teachers. Another section describes more than 100 organizations from which teachers can obtain more resources. And a section on publishers and suppliers give names and addresses of sources for materials. The guide will be invaluable to teachers, principals, administrators, teacher trainers, science curriculum specialists, and advocates of hands-on science teaching, and it will be of interest to parent-teacher

organizations and parents.

Bring 'em Back Alive Frank Buck,2000 The intrepid Texas jungle adventurer Frank Buck spent his life capturing alive every kind of animal, and enthralled generations of readers with the stories of danger and daring collected here.

To Life! Linda Weintraub,2012-09-01 This title documents the burgeoning eco art movement from A to Z, presenting a panorama of artistic responses to environmental concerns, from Ant Farms anti-consumer antics in the 1970s to Marina Zurkows 2007 animation that anticipates the havoc wreaked upon the planet by global warming.

New York for Kids Patricia J. Wynne,2005-06-01 Illustrations of 25 sites of New York City with appeal to grade-school children, such as the Statue of Liberty and Ellis Island, the ships at South Street Seaport, mummies at the Metropolitan Museum of Art, and dinosaurs at the American Museum of Natural History. Suitable for coloring, with informative captions accompanying each illustration.

Safari, So Good! Bonnie Worth,2019-12-10 In this latest installment of the Cat in the Hat's Learning Library, the Cat takes Sally and Nick to Africa—where they meet some really big cats—and all sorts of other animals, too, including elephants, zebra, giraffe, hippos, warthogs, buffalo, baboons, side-striped jackals, spotted hyena, galagos, pythons, vipers, and six kinds of antelope! Young readers will learn how animals are either predators or prey, that elephants tend to favor one tusk over the other, how to tell the difference between a white and black rhino (both of which are grey!), that lion cubs are born covered with spots that soon disappear, and much, much more! Fans of the new PBS preschool science show *The Cat in the Hat Knows a Lot About That!* (which is based on *The Cat in the Hat's Learning Library*) won't want to miss this wild new addition to the series!

The Artist Who Painted a Blue Horse Eric Carle,2020-05-05 A brilliant new Eric Carle picture book for the artist in us all. Every child has an artist inside them, and this vibrant picture book from Eric Carle will help let it out. The artist in this book paints the world as he sees it, just like a child. There's a red crocodile, an orange elephant, a purple fox and a polka-dotted donkey. More than anything, there's imagination. Filled with some of the most magnificently colorful animals of Eric Carle's career, this tribute to the creative life celebrates the power of art.

The Other Wes Moore Wes Moore,2010-04-27 NEW YORK TIMES BESTSELLER • From the governor of Maryland, the “compassionate” (People), “startling” (Baltimore Sun), “moving” (Chicago Tribune) true story of two kids with the same name from the city: One went on to be a Rhodes Scholar, decorated combat veteran, White House Fellow, and business leader. The other is serving a life sentence in prison. Selected by Stephen Curry as his “Underrated” Book Club Pick with Literati The chilling truth is that his story could have been mine. The tragedy is that my story could have been his. In December 2000, the Baltimore Sun ran a small piece about Wes Moore, a local student who had just received a Rhodes Scholarship. The same paper also ran a series of articles about four young men who had allegedly killed a police officer in a spectacularly botched

armed robbery. The police were still hunting for two of the suspects who had gone on the lam, a pair of brothers. One was named Wes Moore. Wes just couldn't shake off the unsettling coincidence, or the inkling that the two shared much more than space in the same newspaper. After following the story of the robbery, the manhunt, and the trial to its conclusion, he wrote a letter to the other Wes, now a convicted murderer serving a life sentence without the possibility of parole. His letter tentatively asked the questions that had been haunting him: Who are you? How did this happen? That letter led to a correspondence and relationship that have lasted for several years. Over dozens of letters and prison visits, Wes discovered that the other Wes had had a life not unlike his own: Both had had difficult childhoods, both were fatherless; they'd hung out on similar corners with similar crews, and both had run into trouble with the police. At each stage of their young lives they had come across similar moments of decision, yet their choices would lead them to astonishingly different destinies. Told in alternating dramatic narratives that take readers from heart-wrenching losses to moments of surprising redemption, *The Other Wes Moore* tells the story of a generation of boys trying to find their way in a hostile world.

Brown Bear, Brown Bear, what Do You See? Bill Martin, 1996

Using Technology with Classroom Instruction That Works Howard Pitler, Elizabeth R. Hubbell, Matt Kuhn, 2012-08-02
Technology is ubiquitous, and its potential to transform learning is immense. The first edition of *Using Technology with Classroom Instruction That Works* answered some vital questions about 21st century teaching and learning: What are the best ways to incorporate technology into the curriculum? What kinds of technology will best support particular learning tasks and objectives? How does a teacher ensure that technology use will enhance instruction rather than distract from it? This revised and updated second edition of that best-selling book provides fresh answers to these critical questions, taking into account the enormous technological advances that have occurred since the first edition was published, including the proliferation of social networks, mobile devices, and web-based multimedia tools. It also builds on the up-to-date research and instructional planning framework featured in the new edition of *Classroom Instruction That Works*, outlining the most appropriate technology applications and resources for all nine categories of effective instructional strategies: * Setting objectives and providing feedback * Reinforcing effort and providing recognition * Cooperative learning * Cues, questions, and advance organizers * Nonlinguistic representations * Summarizing and note taking * Assigning homework and providing practice * Identifying similarities and differences * Generating and testing hypotheses Each strategy-focused chapter features examples—across grade levels and subject areas, and drawn from real-life lesson plans and projects—of teachers integrating relevant technology in the classroom in ways that are engaging and inspiring to students. The authors also recommend dozens of word processing applications, spreadsheet generators, educational games, data collection tools, and online resources that can help make lessons more fun, more challenging, and—most of all—more effective.
