Testing Miss Malarkey Judy Finchler,2014-02-25 The new school year brings standardized testing to every school and Miss Malarkey's is no exception. Teachers, students, and even parents are preparing for THE TEST-The Instructional Performance Through Understanding (IPTU) test-and the school is in an uproar. Even though the grown-ups tell the children not to worry, they're acting kind of strange. The gym teacher is teaching stress-reducing yoga instead of sports in gym class. Parents are giving pop quizzes on bedtime stories at night. The cafeteria is serving brain food for lunch. The kids are beginning to think that maybe the test is more important than they're being led to believe. Kids and adults alike will laugh aloud as Finchler and O'Malley poke fun at the commotion surrounding standardized testing, a staple of every school's year.

Saint Valentine Robert Sabuda,2009-08 In ancient Rome there lived a humble man named Valentine. He was a physician, but he was also a Christian priest whose life and freedom were in constant danger in a city of people who believed in many gods, not just one. One day a jailer from the emperor's prison appeared at Valentine's door with his small child, a girl who was blind. Knowing the difficulty of curing blindness, Valentine vowed to do his best, and over the weeks of treatment and prayer the three became fast friends. Here, accompanied by Sabuda's full-color mosaics evoking the time period in which the story takes place, is the story of a man whose goodness and faith brought about a miracle, and whose name lives on in one of our most celebrated holidays. Reinforced binding.

Your Guide to Lowering Your Blood Pressure with Dash U. S. Department Human Services,National Health,Department Of Health And Human Services,Lung, and Blood, National Heart Institute,National Heart Lung Institute, And,2012-07-09 This book by the National Institutes of Health (Publication 06-4082) and the National Heart, Lung, and Blood Institute provides information and effective ways to work with your diet because what you choose to eat affects your chances of developing high blood pressure, or hypertension (the medical term). Recent studies show that blood pressure can be lowered by following the Dietary Approaches to Stop Hypertension (DASH) eating plan-and by eating less salt, also called sodium. While each step alone lowers blood pressure, the combination of the eating plan and a reduced sodium intake gives the biggest benefit and may help prevent the development of high blood pressure. This book, based on the DASH research findings, tells how to follow the DASH eating plan and reduce the amount of sodium you consume. It offers tips on how to start and stay on the eating plan, as well as a week of menus and some recipes. The menus and recipes are given for two levels of daily sodium consumption-2,300 and 1,500 milligrams per day. Twenty-three hundred milligrams is the highest level considered acceptable by the National High Blood Pressure Education Program. It is also the highest amount recommended for healthy Americans by the 2005 U.S. Dietary Guidelines for Americans. The 1,500 milligram level can lower blood pressure further and more recently is the amount recommended by the Institute of Medicine as an adequate intake level and one that most people should try to achieve. The lower your salt intake is, the lower your blood pressure. Studies have found that the DASH menus containing 2,300 milligrams of sodium can lower blood pressure and that an even lower level of sodium, 1,500 milligrams, can further reduce blood pressure. All the menus are lower in sodium than what adults in the United States currently eat-about 4,200 milligrams per day in men and 3,300 milligrams per day in women. Those with high blood pressure and prehypertension may benefit especially from following the DASH eating plan and reducing their sodium intake.
