Our Gods Wear Spandex Chris Knowles,2007-11-30 From occult underground to superhero! Was Superman's arch nemesis Lex Luthor based on Aleister Crowley? Can Captain Marvel be linked to the Sun gods on antiquity? In Our Gods Wear Spandex, Christopher Knowles answers these questions and brings to light many other intriguing links between superheroes and the enchanted world of estoerica. Occult students and comic-book fans alike will discover countless fascinating connections, from little known facts such as that DC Comics editor Julius Schwartz started his career as H.P. Lovecraft's agent, to the tantalizingly extensive influence of Madame Blavatsky's Theosophy on the birth of comics, to the mystic roots of Superman. The book also traces the rise of the comic superheroes and how they relate to several cultural trends in the late 19th century, specifically the occult explosion in Western Europe and America. Knowles reveals the four basic superhero archetypes--the Messiah, the Golem, the Amazon, and the Brotherhood--and shows how the occult Bohemian underground of the early 20th century provided the inspiration for the modern comic book hero. With the popularity of occult comics writers like Invisibles creator Grant Morrison and V for Vendetta creator Alan Moore, the vast ComiCon audience is poised for someone to seriously introduce them to the esoteric mysteries. Chris Knowles is doing just that in this epic book.

Chapters include: Ancient of Days, Ascended Masters, God and Gangsters, Mad Scientists and Modern Sorcerers, and many more. From the ghettos of Prague to the halls of Valhalla to the Fortress of Solitude and the aisles of BEA and ComiCon, this is the first book to show the inextricable link between superheroes and the enchanted world of esoterica.

This innovative method for structuring a screenplay is designed to keep writers focused on the heart and soul of their story so that plot, character and theme create a unified whole. The Wretched of the Screen Hito Steyerl, 2013-04-05 In Hito Steyerl's writing we begin to see how, even if the hopes and desires for coherent collective political projects have been displaced onto images and screens, it is precisely here that we must look frankly at the technology that seals them in. *The Wretched of the Screen* collects a number of Steyerl's landmark essays from recent years in which she has steadily developed her very own politics of the image. Twisting the politics of representation around the representation of politics, these essays uncover a rich trove of information in the formal shifts and aberrant distortions of accelerated capitalism, of the art system as a vast mine of labor extraction and passionate commitment, of occupation and internship, of structural and literal violence, enchantment and fun, of hysterical, uncontrollable flight through the wreckage of postcolonial and modernist discourses and their unanticipated openings. *e-flux journal Series* edited by Julieta Aranda, Brian Kuan Wood, Anton Vidokle

Speak Out! Brixton Black Women's Group,2023-10-10 We came to Britain in search of better opportunities or to get some of the wealth which had been misappropriated from the Caribbean, but what in reality did we find? *Speak Out* brings together the writings of Brixton Black Women's Group for the first time, in a landmark collection. Established in response to the lack of interest in women's issues experienced in male-dominated Black organisations, the Brixton Black Women's Group's aim was to create a distinct space where women of African and Asian descent could meet to focus on political, social and cultural issues as they affected black women. BBWG published its own newsletter, *Speak Out*, which kept alive the debate about the relevance of feminism to black politics and provided a black women's perspective on immigration, housing, health and culture.

Automated Insulin Delivery Dana M Lewis,2019-05-31 Automated insulin delivery goes by many names: hybrid or full closed loop; artificial pancreas system (APS); looping and more. They are not all the same, though. You have choices, ranging from the type of pump body and CGM you want to use, to the algorithm and controller, to the interoperability and remote monitoring options, and more. Like switching from multiple daily injections to an insulin pump, switching from manual diabetes to automated insulin delivery has a learning curve. It's certainly one you can tackle. After all, you're already tackling type 1 diabetes! You already have the base knowledge and experience you need to succeed with a closed loop system, if it's right for you. But you might be wondering how to get ahead of your learning curve before you start or even choose an APS, or you've started and want to dig even deeper into optimizing how an automated insulin delivery system fits into your

lifestyle. This book was written for you! It leverages the collective knowledge of the early adopters of do-it-yourself and commercial systems from the past five years and packages it into easy, understandable guides and lessons learned. In this book, you'll find new analogies to help you understand - and explain - this new method of diabetes management, and tips on how to communicate with your healthcare provider(s) about it. You'll see stories and examples from real families and individuals living with type 1 diabetes and how they benefit from artificial pancreas systems, and why they chose and continue to choose to use them. You'll be empowered to understand the basic components of artificial pancreas systems, how they work, and what questions to ask as you peruse your choices now and in the future. This book also includes a foreword by Aaron Kowalski, President and CEO of JDRF, and co-founder of the JDRF Artificial Pancreas Project. I will immediately recommend this book not just to people looking to use a DIY closed loop system, but also to anybody looking to improve their grasp on the management of type 1 diabetes, whether patient, caregiver, or healthcare provider. - Aaron Neinstein, MD (Endocrinologist, UCSF)
