Mastering Your Adult ADHD Steven A. Safren, Susan E. Sprich, Carol A. Perlman, Michael W. Otto, 2017 Attention Deficit/Hyperactivity Disorder (ADHD) in adulthood is a prevalent and impairing disorder. While medications have been effective in treating adult ADHD, the majority of individuals treated with medications still have symptoms that require additional skills and symptom management strategies. This Second Edition of Mastering Your Adult ADHD is thoroughly updated to present the most current, empirically supported treatment strategies in cognitive behavioral therapy (CBT) for coping with symptoms of adult ADHD. The Therapist Guide provides clinicians with effective means of teaching adult clients skills that have been scientifically tested and shown to help them cope with ADHD. The program has been updated to include the optional use of technology and smart phones to improve organization and planning. Core modules cover the development of systems for keeping track of appointments and tasks, reducing distractibility, and improving adaptive thinking skills, and there's an optional module on reducing procrastination. Information is also provided regarding holding an informational meeting with a spouse, partner, or family member. The step-by-step, session-by-session descriptions are a practical resource for therapists who deliver the treatment. The companion Client Workbook contains all of the necessary information for participating in the practical CBT intervention. It includes worksheets, forms, and a link to an assessment measure that can be used to gauge progress during treatment.

CBT Toolbox for Children and Adolescents Lisa Weed Phifer,Amanda K. Crowder,Tracy Elsenraat,Robert Hull,2017 Inside this workbook you'll find hundreds of worksheets, exercises, and activities to help treat: - Trauma - ADHD - Autism - Anxiety - Depression - Conduct Disorders. Written by clinicians and teachers with decades of experience working with kids, these practical and easy-to-use therapy tools are vital to teaching children how to cope with and overcome their deepest struggles.

The Practice of Child Therapy Richard J. Morris,Thomas R. Kratochwill,2008 Consistent with previous editions, this book assembles in a single volume summaries of the treatment literature and treatment procedures of the most common childhood behavior disorders facing persons who practice in applied settings--clinics, schools, counseling centers, psychiatric hospitals, and residential treatment centers. Its 16 chapters cover the historical context of child and adolescent therapy; obsessive compulsive disorders; childhood depression; childhood fears, phobias and related anxieties; attention-deficit hyperactivity disorder; academic problems; conduct disorder; somatic disorders; autism spectrum disorder; intellectual disabilities; children medically at risk; sexual and other abuse of children; child and adolescent psychopharmacotherapy; prevention; and child therapy and the law. Key features include: Treatment Orientation--Although some chapters include a discussion of

theoretical issues, the primary emphasis is on intervention techniques and strategies for changing various behavior and learning problems. Case examples are often used to illustrate treatment procedures. Empirical Orientation--While most authors have adopted a broad-based behavioral or cognitive-behavioral orientation, they were encouraged to review the entire treatment literature and to construct their presentations on the basis of empirically supported treatment techniques and procedures. Psychopharmacotherapy Chapter--The chapter on child and adolescent psychopharmacotherapy focuses on psychopharmacological interventions rather than on which drugs should be prescribed for specific behavior or learning problems. Author Expertise--Each chapter is written by experts who are well qualified to discuss treatment practices for the specific topic under discussion. This book is intended for individuals who have entered or plan to enter the mental health profession or such related professions as counseling, special education, nursing and rehabilitation. It is especially useful for individuals taking child and adolescent therapy and intervention courses and practicum courses. Finally, it is suitable for persons who work in applied settings including clinics, schools, counseling centers, psychiatric hospitals, and residential treatment centers.
