presentation that you will get absolutely no feedback on and want no help? Maybe you're the type that likes to whip something up and have no practice or feedback at all? Most of us are the former. Before we stand in front of a group of people, we want to make sure we're as polished as possible. The problem is PowerPoint wasn't built like that. It was built as a desktop program that one person would use at a time. Google realized the problem and seized the opportunity when they launched Google Slides over ten years ago. Google Slides is a cloud-based presentation editor that can replace PowerPoint or Keynote. If you'd like to get the most out of the software, then let's get started! Note: This book is the Google Slides portion of the larger work: *The Ridiculously Simple Guide to Google Apps (G Suite)*

Digital Storytelling as Translanguaging Heather A. Linville,Polina Vinogradova,2024-04-01 This innovative, accessible book is an introduction to using digital storytelling in language teaching, with a focus on English as an Additional Language (EAL) instruction. Linville and Vinogradova provide a clear framework that addresses translanguaging and multimodal meaning making in teaching multilingual learners (MLs) through use of digital storytelling. This book provides detailed guidance on how to incorporate digital storytelling into language teaching, building on recent developments in the fields of TESOL and language education that position multilingualism and multiliteracies as important components of any language instruction. Through this text and accompanying activities, readers will understand how to work with MLs to create multimodal digital texts. This book offers an easy-to-follow, step-by-step process for language educators to follow to support MLs' digital storytelling projects in any EAL classroom. Featured digital storytelling projects from EAL practitioners in various contexts, as well as multiple examples and resources, are included for each stage of the process, always grounded in contemporary TESOL theories (e.g., critical pedagogy, culturally responsive teaching, translanguaging, and a pedagogy of multiliteracies). This framework supports the development of multilingualism and multiliteracies and can be adapted by educators of other world languages for any language education setting. Grounded in contemporary TESOL theories, this book is an essential text for courses on technology in TESOL and TESOL methods courses, as well as for language educators.

Presentations for Librarians Lee Hilyer, 2008-01-31 Recent research on learning from multimedia presentations has indicated that the current way many people prepare their slide presentations may actually hinder learning. Considering the ubiquity of the PowerPoint presentation in business and in education, presenters should be concerned whether or not their audience members are effectively receiving the information they wish to impart. This issue is of special import for librarians who teach, as they often must convey complex information in a very limited amount of time. Combining the best evidence on multimedia learning with real-world practical guidelines, this book aims to provide novice and expert presenters alike with the tools they need to ensure an effective, learner-centred presentation. Presents guidelines and techniques based on

evidence from the research literature Provides an easy-to-understand introduction to the relevant learning and instructional design theories behind effective, learner-centred presentations Covers techniques for Microsoft PowerPoint, Apple Keynote and Star Office Impress
