Discourse of Twitter and Social Media Michele Zappavigna, 2012-02-23 Examination of the effects of social media innovations on electronically mediated discourse, focusing on interaction.

Digital Culture & Society (DCS) Julia Ramírez-Blanco, Ramón Reichert, Francesco Spampinato, 2023-05-31 Code is intended both as a computer-based language to program software and as a functional and visual language for organizing administrative processes, visualizing information, performing behaviour control, and reinforcing shared imaginaries based on surveillance and dread. This special issue of *Digital Culture & Society* deals with the concept of code in relation to the Covid-19 crisis. The contributions depart from the idea that both forms of coding have become dramatically intertwined during the pandemic and are structuring a new way of being in and seeing reality. They explore the new forms of data-driven surveillance and representation of the pandemic evolution at the level of real-time epidemiology, sensor technologies, science policies, push media, and the heterogeneous counter-discourses that try to subvert them.

The Template-makers of the Paris Basin John James, 1989 The 12th- and 13th-century early Gothic churches from the region around Paris which form the basis of this study were large-scale undertakings. Dr James draws on evidence which suggests that work proceeded in a series of projects, when funding, technical problems (for example, slow-setting mortar), and the work of other trades (such as roofing and centring) allowed. Within each project there were generally a number of separately organised phases, or 'campaigns', and it is from close study of these campaigns that the author proceeds to an identification of the characteristics of the individual master masons, the template-makers.

Rhetoric and Experience Architecture Liza Potts, Michael J. Salvo, 2017-08-04 Organizations value insights from reflexive, iterative processes of designing interactive environments that reflect user experience. "I really like this definition of experience architecture, which requires that we understand ecosystems of activity, rather than simply considering single-task scenarios."—Donald Norman (*The Design of Everyday Things*)

* _____ This is a story about a life lived in two halves. It's about what happens when real life collides with the increasing absurdity of a world accessed through a screen. It's about living in world that contains both an abundance of proof that there is goodness, empathy, and justice in the universe, and a deluge of evidence to the contrary. It's a meditation on love, language and human connection from one of the most original voices of our time. _____

'An utterly distinctive mixture of depth, dazzling linguistic richness, anarchic wit and raw emotional candour' Rowan Williams

Interactional Humor Béatrice Priego-Valverde, 2023-12-04 The central question explored in this volume is: How is humor multimodally produced, perceived, responded to, and negotiated? To this end, it offers a panorama of linguistic research on multimodal and interactional humor, based on different theoretical frameworks, corpora, and methodologies. Humor is considered as an activity that is interactionally achieved, regardless of whether the interaction in which it is embedded is face-to-face, computer-mediated, with a human or a robot, oral or written. The aim is to analyze both the linguistic resources of the participants (such as their lexicon, prosody, gestures, gazes, or smiles) and the semiotic resources that social networks and instant messaging platforms offer them (such as memes, gifs, or emojis).

Presentation Zen Garr Reynolds, 2009-04-15 FOREWORD BY GUY KAWASAKI Presentation designer and internationally acclaimed communications expert Garr Reynolds, creator of the most popular Web site on presentation design and delivery on the Net — presentationzen.com — shares his experience in a provocative mix of illumination, inspiration, education, and guidance that will change the way you think about making presentations with PowerPoint or Keynote. Presentation Zen challenges the conventional wisdom of making slide presentations in today's world and encourages you to think differently and more creatively about the preparation, design, and delivery of your presentations. Garr shares lessons and perspectives that draw upon practical advice from the fields of communication and business. Combining solid principles of design with the tenets of Zen simplicity, this book will help you along the path to simpler, more effective presentations.

Libraries as Dysfunctional Organizations and Workplaces Spencer Acadia, 2022-11-30 Libraries as Dysfunctional Organizations and Workplaces expands the dysfunctional concept in the professional and academic LIS discourse by exposing the internal problematics of libraries, especially at the social and organizational levels. Including contributions written by LIS professionals and scholars, the book demonstrates that although many libraries do well at attending to users and managing external information they often fail at taking care of their own employees and addressing internal workplace issues. Acadia and the contributing authors explore the problem of dysfunctional libraries so that the LIS profession can come to terms with the systemic dysfunction in their institutions and begin solution-oriented progress toward new and sustainable functionality.

The book analyzes the dysfunctional nature of modern libraries, while simultaneously proposing solutions to reduce and alleviate dysfunction. Through theory and application, it takes an explicit practice-based approach with the intent to inform and explain dysfunction as experienced in the library workplace at individual and structural levels and perspectives. Libraries as Dysfunctional Organizations and Workplaces brings the dysfunction discourse to the attention of LIS academics and scholars so that further theoretical and empirical research can proceed from and subsequently be addressed in library and information schools. The book will also be essential reading for librarians and LIS students currently working or preparing to work in public, college, and university libraries.

The Isle of Blood Rick Yancey, 2011-09-13 This gothic, gory novel—the third book in the Printz Honor-winning *Monstrumologist* series—is “articulately literary, horrifically grotesque, and mind-bendingly complex” (Kirkus Reviews). When Dr. Warthrop goes hunting for the “Holy Grail of Monstrumology” with his eager new assistant, Arkwright, he leaves Will Henry in Victorian New York. Finally, Will can enjoy something that always seemed out of reach: a normal life with a real family. But part of Will can't let go of Dr. Warthrop, and when Arkwright returns, claiming that the doctor is dead, Will is devastated—and not convinced. Determined to discover the truth, Will travels to London, knowing that if he succeeds, he will

be plunging into depths of horror worse than anything he has experienced so far. His journey takes him to Socotra, the Isle of Blood, where human beings are used to make nests and blood rains from the sky—and puts Will Henry's loyalty to the ultimate test.

Old Books, New Technologies David McKitterick,2013-04-18 As we rely increasingly on digital resources, and libraries discard large parts of their older collections, what is our responsibility to preserve 'old books' for the future? David McKitterick's lively and wide-ranging study explores how old books have been represented and interpreted from the eighteenth century to the present day. Conservation of these texts has taken many forms, from early methods of counterfeiting, imitation and rebinding to modern practices of microfilming, digitisation and photography. Using a comprehensive range of examples, McKitterick reveals these practices and their effects to address wider questions surrounding the value of printed books, both in terms of their content and their status as historical objects. Creating a link between historical approaches and the emerging technologies of the future, this book furthers our understanding of old books and their significance in a world of emerging digital technology.

Humour in Self-Translation Margherita Dore,2022-10-15 This book explores an important aspect of human existence: humor in self-translation, a virtually unexplored area of research in Humour Studies and Translation Studies. Of the select group of international scholars contributing to this volume some examine literary texts from different perspectives (sociological, philosophical, or post-colonial) while others explore texts in more extraneous fields such as standup comedy or language learning. This book sheds light on how humour in self-translation induces thoughts on social issues, challenges stereotypes, contributes to recast individuals in novel forms of identity and facilitates reflections on our own sense of humour. This accessible and engaging volume is of interest to advanced students of Humour Studies and Translation Studies.

Meme Media and Meme Market Architectures Yuzuru Tanaka,2003-07-10 This book provides an integrated view of the five kinds of enabling technologies in terms of knowledge media architectures: multimedia and hypermedia, object-oriented GUI and visual programming, reusable component software and component integration, network publishing and electronic commerce, and object-oriented and multimedia databases. Among many books on multimedia and hypermedia, few address

knowledge. Of those that do, none focus on media for the editing, distribution, and management of knowledge the way this book does. It is written based on the hypothesis that knowledge media work as genes, with their network publishing repository, working as a gene pool to accelerate the evolution of knowledge shared in our societies.
