Be CentsAble Chrissy Pate, Kristin McKee, 2010-03-30 As seen on Good Morning America and successfully adopted by thousands of subscribers, this easy-to-use system will help slash any household budget. Now more than ever, people are desperate to save money without scrimping on every little purchase or sacrificing their lifestyle. Like most Americans, stay-at-home moms Chrissy Pate and Kristin McKee spent the lion's share of their budgets on what they assumed to be static costs such as groceries and utilities. But when using traditional couponing and cheapskate guides didn't help their budgets shrink by a dime, Pate and McKee decided to come up with their own way to save. Within a few months, their household expenses dropped by more than half—from spending \$800 each per month to less than \$350! Only a few years after developing their Be CentsAble system, Pate and McKee have helped thousands of subscribers save money without spending hours finding and cutting coupons, or giving up extras like travel and entertainment. In this prescriptive guide, these authors show how anyone can save thousands of dollars on cleaning supplies, pet care, toys, travel, and most importantly, groceries—without giving up healthy foods, favorite products, or the occasional splurge.

Niche Envy Joseph Turow, 2008-02-15 The price we pay for the new strategies in database marketing that closely track

desirable customers, offering them benefits in return for personal information. We have all been to Web sites that welcome us by name, offering us discounts, deals, or special access to content. For the most part, it feels good to be wanted—to be valued as a customer. But if we thought about it, we might realize that we've paid for this special status by turning over personal information to a company's database. And we might wonder whether other customers get the same deals we get, or something even better. We might even feel stirrings of resentment toward customers more valued than we are. In *Niche Envy*, Joseph Turow examines the emergence of databases as marketing tools and the implications this may have for media, advertising, and society. If the new goal of marketing is to customize commercial announcements according to a buyer's preferences and spending history—or even by race, gender, and political opinions—what does this mean for the twentieth-century tradition of equal access to product information, and how does it affect civic life? Turow shows that these marketing techniques are not wholly new; they have roots in direct marketing and product placement, widely used decades ago and recently revived and reimagined by advertisers as part of customer relationship management (known popularly as CRM). He traces the transformation of marketing techniques online, on television, and in retail stores. And he describes public reaction against database marketing—pop-up blockers, spam filters, commercial-skipping video recorders, and other ad-evasion methods. Polls show that the public is nervous about giving up personal data. Meanwhile, companies try to persuade the most desirable customers to trust them with their information in return for benefits. *Niche Envy* tracks the marketing logic that got us to this uneasy impasse.

It means that David Verklin, CEO of one of the world's largest ad-buying companies, and his clients—the world's largest advertisers—control what TV programs get aired, what magazines get published, and how Google and Yahoo stay in (very healthy) business. Fiscal Policies for Development and Climate Action Miria A. Pigato,2018-12-31 This report provides actionable advice on how to design and implement fiscal policies for both development and climate action. Building on more than two decades of research in development and environmental economics, it argues that well-designed environmental tax reforms are especially valuable in developing countries, where they can reduce emissions, increase domestic revenues, and generate positive welfare effects such as cleaner water, safer roads, and improvements in human health. Moreover, these reforms need not harm competitiveness. New empirical evidence from Indonesia and Mexico suggests that under certain conditions, raising fuel prices can actually increase firm productivity. Finally, the report discusses the role of fiscal policy in strengthening resilience to climate change. It provides evidence that preventive public investments and measures to build fiscal buffers can help safeguard stability and growth in the face of rising climate risks. In this way, environmental tax reforms and climate risk-management strategies can lay the much-needed fiscal foundation for development and climate action.

The Ash Warriors C. R. Anderegg,2000 In November 1991 the American flag was lowered for the last time at Clark Air Base in the Philippines. This act brought to an end American military presence in the Philippines that extended back over 90 years. It also represented the final act in a drama that began with the initial rumblings in April of that year of the Mount Pinatubo volcano, located about nine miles to the east of Clark. This book tells the remarkable story of the men and women of the Clark community and their ordeal in planning for and carrying out their evacuation from Clark in face of the impending volcanic activity. It documents the actions of those who remained on the base during the series of Mount Pinatubo's eruptions, and the packing out of the base during the subsequent months. This is the story of the Ash Warriors, those Air Force men and women who carried out their mission in the face of an incredible series of natural disasters, including volcanic eruption, flood, typhoons, and earthquakes, all of which plagued Clark and the surrounding areas during June and July 1991.
