Talent Chooses You James Ellis, 2020-06-03 If you want your business to grow, you need to be able to rely on your ability to hire talent reliably and consistently. No talent pipeline? No growth, and no business. But your recruiting team is drowning (I asked them). They need help. Now, if you ask recruiters, they will ask for headcount. Or more technology. But more bodies and more tools won't solve the issue (though it will eat up your budget). What you need is a better strategy. And that strategy is called employer branding. Employer branding is about understanding, distilling and communicating what your company is all about in order to attract all the talent you need. That will differentiate your company as a place where people will want to work, rather than a place they land because they didn't know better. If you've heard about employer branding in business magazines, it might seem like something only big companies can do. Something that requires a dedicated team, expensive platforms, or a bunch of consultants. That isn't true. If you understand where your brand comes from, and how to apply it, any company (especially yours) can hire better with it. And this book will teach you how to do all of that, and then some. In this book, you'll learn what employer branding really is, how to make a compelling argument

internally to leadership that creates commitment, how to work with other teams and be creative in finding solutions. As a special bonus, we are including a handbook on how to work with recruiting teams. This hands-on workbook is chock full of examples, checklists, step-by-step instructions and even emails you can copy and paste to make things happen immediately.

Occupational Therapy Practice Framework: Domain and Process Aota,2014 As occupational therapy celebrates its centennial in 2017, attention returns to the profession's founding belief in the value of therapeutic occupations as a way to remediate illness and maintain health. The founders emphasized the importance of establishing a therapeutic relationship with each client and designing an intervention plan based on the knowledge about a client's context and environment, values, goals, and needs. Using today's lexicon, the profession's founders proposed a vision for the profession that was occupation based, client centered, and evidence based--the vision articulated in the third edition of the Occupational Therapy Practice Framework: Domain and Process. The Framework is a must-have official document from the American Occupational Therapy Association. Intended for occupational therapy practitioners and students, other health care professionals, educators, researchers, payers, and consumers, the Framework summarizes the interrelated constructs that describe occupational therapy practice. In addition to the creation of a new preface to set the tone for the work, this new edition includes the following highlights: a redefinition of the overarching statement describing occupational therapy's domain; a new definition of clients that includes persons, groups, and populations; further delineation of the profession's relationship to organizations; inclusion of activity demands as part of the process; and even more up-to-date analysis and guidance for today's occupational therapy practitioners. Achieving health, well-being, and participation in life through engagement in occupation is the overarching statement that describes the domain and process of occupational therapy in the fullest sense. The Framework can provide the structure and guidance that practitioners can use to meet this important goal.

Launch! Advertising and Promotion in Real Time Michael Solomon, 2009 Launch! Advertising and Promotion is written for advertising and promotion courses taught to students in the business school and journalism & mass communication students. This textbook is the first of its kind to teach advertising concepts by reverse engineering a real advertising campaign from beginning to end. In April 2007, SS+K, an innovative New York City communications agency, launched the first ever branding campaign for msnbc.com with the tag A Fuller Spectrum of News. Launch! follows that campaign from initial agency pitch through roll-out of print and media assets to post-campaign analysis. Throughout, it exposes readers to the theory and concepts of advertising and promotion, and the personalities and decisions that drove this campaign. The book takes a rare look behind the curtain - even letting you see some of the paths not chosen by the agency and client. Students get a realistic sense of how theory plays out in practice, and get a flavor for the exciting field of advertising and promotion. And, they consistently learn the perspectives of both the advertising agency (where many journalism and communications students will work) and the client (where many marketing majors will work). This is a unique book, with a unique perspective, by a unique author team, and you won't find this kind of insight in any other text on the

market. We think you're going to love it! This textbook has been used in classes at: Ball State University, Emerson College, Florida Institute of Technology, Grand Valley State University, Johnson County Community College, Manchester Business School, McLennan Community College, Michigan State University, North Hennepin Community College, Pierce College, Rochester Institute of Technology, Saint Louis University, Salem State College, South Dakota State University, Texas State University, Texas Tech University, University of New Hampshire, University of North Carolina, University of Notre Dame, University of South Florida, Virginia Tech, Western Kentucky University.

Social Media in an English Village Daniel Miller,2016-02-29 Daniel Miller spent 18 months undertaking an ethnographic study with the residents of an English village, tracking their use of the different social media platforms. Following his study, he argues that a focus on platforms such as Facebook, Twitter and Instagram does little to explain what we post on social media. Instead, the key to understanding how people in an English village use social media is to appreciate just how 'English' their usage has become. He introduces the 'Goldilocks Strategy': how villagers use social media to calibrate precise levels of interaction ensuring that each relationship is neither too cold nor too hot, but 'just right'.
