Kids Learning - Alphabet Chart ,2020-05-07 MAKE LEARNING EASY & FUN WITH OUR PRINTABLE ALPHABET CHART!The Alphabet Chart can be an important part of teaching your child how to recognize the individual letters and sounds of the alphabet; this is part of the process of learning to read. Our Alphabet Chart consists of the 26 letters of the alphabet and a picture corresponding to the phonic sound of each letter, the chart is a great tool to teach the alphabet to your child!HOW IT WORKSA parent will point and recite the letter and picture name. For example a - apple, b - ball, c - cat....It is important that you go through the alphabet chart at the right speed, too slow and your child will get bored. Provide your child with the opportunity to join the game by reciting the name of pictures or letters as they begin to recognize them.Depending on the ability of your child, you can simplify or add complexity to the game by reciting the pictures only or letters only. Or you can add a variation by introducing the phonics sound for each letter.ALPHABET ACTIVITIESThere are a range of activities that parents can use to teach letters to children. Here are some basics you can conduct with an alphabet chart: Play a game where you give your child a word and they find the letter that word starts with on the alphabet chart.As you recite the word the word, have your child come up with other words that start with that letter / sound.You can use the letter-only version of the alphabet chart to help your child practice writing letters.

Number Sense Routines Jessica Shumway,2023-10-10 In this groundbreaking and highly practical book,Number Sense Routines: Building Numerical Literacy Every Day in Grades K-3, author Jessica Shumway proposes that all children have innate number sense which can be developed through daily exercise. Shumway createda series of math routines designed to help young students strengthen and build their facility with numbers. These quick 5, 10, or 15 minute exercises are easy to implement as an add-on to any elementary math curriculum. Understanding Number Sense: Students with strong number

sense understand numbers, how to subitize, relationships among numbers, and number systems. They make reasonable estimates, compute fluently, use reasoning strategies, and use visual models to solve problems. Number Sense Routines supports the early learner by instilling the importance of daily warm-ups and explains how they benefit developing math minds for long-term learning. Real Classroom Examples: Shumway compiled her classroom observations from around the country. She includes conversations among students who practice number sense routines to illustrate them in action, how children's number sense develops with daily use, and math strategies students learn as they develop their numerical literacy through self-paced practice. Assessment Strategies: Number Sense Routines demonstrates the importance of listening to your students and knowing what to look for. Teachers will gain a deeper understanding of the underlying math skills and strategies students learn as they develop numerical literacy. Shumway writes, As you read, you will step into various classrooms and listen in on students' conversations, which I hope will give you insight into the power of number sense routines and the impact they have on students' number sense development. My hope is that going into the classroom, into students' conversations, and into their thought processes, you will come away with new ideas and tools to use in your own classroom.

The Easel/Maize - Book 21 Debbie Hepplewhite MBE FRSA,2022-10-20 ABOUT THIS READING BOOK SERIES These cumulative, decodable phonics ebooks provide an effective and enjoyable 'stand-alone' approach to teach beginning reading. They are also designed to complement No Nonsense Phonics Skills (Pupil Books 1 to 8) and the Phonics International programme - a FREE online programme (Units 1 to 6 of 12 Units). The books can be used to complement and supplement other early reading programmes and reading instruction. The series is colour-coded for ease of organisation and management. The back covers indicate the code featured cumulatively in each book. Purpose - these books are designed for children: 1. to practise the technical skill of decoding new printed words by sounding out and blending ('lifting the words off the page') using their knowledge of letter/s-sound correspondences (the alphabetic code) 2. to learn the meaning of new words, enriching their vocabulary, in the context of events in the storylines 3. to practise reading aloud with increasing confidence and fluency - learning how to use expression when re-reading The books are challenging: The books are structured to be 'cumulative' and 'decodable' and they are also challenging. They include shorter and longer words from the outset and some words that are likely to be new to children's spoken language. Generally, there are many words on most pages to provide plenty of accurate decoding practice. After the children have decoded any new words they do not automatically recognise, the supporting adult can discuss the storylines, including with reference to the illustrations, to explain new words. There is 'Vocabulary Support' in the back of the books. Capital letters are code for the same sounds as

their lower case letters. Children should attempt to decode the words, sentences or pages by themselves at first with the adult encouraging, supporting, re-reading words, sentences and pages as required. Some beginners may only manage one page in any one reading session until they have perfected the phonics skill of sounding out in response to letters and letter groups, and blending the sounds (synthesising) to decode new words. Children learn at different rates and have different needs: Debbie's approach includes incidental phonics teaching and support as well as systematic provision. Some children may need reminding of letter/s-sound correspondences that are not yet embedded in memory. Some children will self-teach as they learn more about the alphabetic code, and some children will recognise words they've previously read more easily than others. Some children may be able to 'discern' (detect) a word they've sounded out because they know the word in their spoken language, but struggle to 'discern' a new printed word that is not in their spoken language. This will improve over time as children decode and learn new words from the literature they read not just the words they hear and speak. Using the books in the school and at home advisedly: In school, teachers may decide to use these books lagging behind the introduction of the various letter/s-sound correspondences for additional reading practice. Both the No Nonsense Phonics and the Phonics International programmes already provide plain 'matched texts' for children's reading, writing, spelling and language comprehension. These reading books are additional and complementary to the phonics programmes. Teachers may decide to cascade these books to children for home-reading starting with the children who are the quickest and most adept at sounding out and blending to decode new words. Teachers may decide to use these books in school for supported practice in school before sending them home for re-reading in the home. Again, this may depend on the children themselves and how teachers decide the books will be most beneficial - particularly when children are beginners. Teachers may use later books differently according to children's changing needs over time. Children can be introduced to letter/s-sound correspondences 'incidentally' and this will add to their code knowledge and capacity to self-teach over time. Illustrations: The pictures in children's books enhance the storylines and often tell a story beyond the words on the pages. It is important that the 'back and forth' discussions between adults and children always take place with these phonics reading books no less than with storybooks. In addition, 'homophones' are so common in the English language that it is helpful, as adults, to point out that the same words can have various meanings in different contexts - and to engage children fully with this notion. About the 'sounds' and the alphabetic code: Parents and carers can 'hear' the sounds via an audio Alphabetic Code Chart at alphabeticcodecharts.com . There are also free printable alphabetic code charts at this site. Tweaking or modifying pronunciation: It is very common that a spoken word's final pronunciation needs to be 'tweaked' or 'modified' after sounding out and blending. Early examples of this are words such as 'is', 'his', 'as', 'has'. In reality, these words are pronounced 'iz', 'hiz', 'az', 'haz' with a /z/ sound at the end, not a /s/ sound, but most children who are decoding these words will automatically sound them out and then say them with their correct pronunciation even without thinking about it. The sooner

adults and children alike understand this constant process of slight modification of pronunciation (as required), the sooner a wider range of words can be included for beginners.

automatically recognise, the supporting adult can discuss the storylines, including with reference to the illustrations, to explain new words. There is 'Vocabulary Support' in the back of the books. Capital letters are code for the same sounds as their lower case letters. Children should attempt to decode the words, sentences or pages by themselves at first with the adult encouraging, supporting, re-reading words, sentences and pages as required. Some beginners may only manage one page in any one reading session until they have perfected the phonics skill of sounding out in response to letters and letter groups, and blending the sounds (synthesising) to decode new words. Children learn at different rates and have different needs: Debbie's approach includes incidental phonics teaching and support as well as systematic provision. Some children may need reminding of letter/s-sound correspondences that are not yet embedded in memory. Some children will self-teach as they learn more about the alphabetic code, and some children will recognise words they've previously read more easily than others. Some children may be able to 'discern' (detect) a word they've sounded out because they know the word in their spoken language, but struggle to 'discern' a new printed word that is not in their spoken language. This will improve over time as children decode and learn new words from the literature they read not just the words they hear and speak. Using the books in the school and at home advisedly: In school, teachers may decide to use these books lagging behind the introduction of the various letter/s-sound correspondences for additional reading practice. Both the No Nonsense Phonics and the Phonics International programmes already provide plain 'matched texts' for children's reading, writing, spelling and language comprehension. These reading books are additional and complementary to the phonics programmes. Teachers may decide to cascade these books to children for home-reading starting with the children who are the quickest and most adept at sounding out and blending to decode new words. Teachers may decide to use these books in school for supported practice in school before sending them home for re-reading in the home. Again, this may depend on the children themselves and how teachers decide the books will be most beneficial - particularly when children are beginners. Teachers may use later books differently according to children's changing needs over time. Children can be introduced to letter/s-sound correspondences 'incidentally' and this will add to their code knowledge and capacity to self-teach over time. Illustrations: The pictures in children's books enhance the storylines and often tell a story beyond the words on the pages. It is important that the 'back and forth' discussions between adults and children always take place with these phonics reading books no less than with storybooks. In addition, 'homophones' are so common in the English language that it is helpful, as adults, to point out that the same words can have various meanings in different contexts - and to engage children fully with this notion. About the 'sounds' and the alphabetic code: Parents and carers can 'hear' the sounds via an audio Alphabetic Code Chart at alphabeticcodecharts.com . There are also free printable alphabetic code charts at this site. Tweaking or modifying pronunciation: It is very common that a spoken word's final pronunciation needs to be 'tweaked' or 'modified' after sounding out and blending. Early examples of this are words such as 'is', 'his', 'as', 'has'. In reality, these words are pronounced 'iz',

'hiz', 'az', 'haz' with a /z/ sound at the end, not a /s/ sound, but most children who are decoding these words will automatically sound them out and then say them with their correct pronunciation even without thinking about it. The sooner adults and children alike understand this constant process of slight modification of pronunciation (as required), the sooner a wider range of words can be included for beginners.

Play the Music/Rock the Baby - Book 17 Debbie Hepplewhite MBE FRSA, 2022-10-11 ABOUT THIS READING BOOK SERIES These cumulative, decodable phonics ebooks provide an effective and enjoyable 'stand-alone' approach to teach beginning reading. They are also designed to complement No Nonsense Phonics Skills (Pupil Books 1 to 8) and the Phonics International programme - a FREE online programme (Units 1 to 6 of 12 Units). The books can be used to complement and supplement other early reading programmes and reading instruction. The series is colour-coded for ease of organisation and management. The back covers indicate the code featured cumulatively in each book. Purpose - these books are designed for children: 1. to practise the technical skill of decoding new printed words by sounding out and blending ('lifting the words off the page') using their knowledge of letter/s-sound correspondences (the alphabetic code) 2. to learn the meaning of new words, enriching their vocabulary, in the context of events in the storylines 3. to practise reading aloud with increasing confidence and fluency - learning how to use expression when re-reading The books are challenging: The books are structured to be 'cumulative' and 'decodable' and they are also challenging. They include shorter and longer words from the outset and some words that are likely to be new to children's spoken language. Generally, there are many words on most pages to provide plenty of accurate decoding practice. After the children have decoded any new words they do not automatically recognise, the supporting adult can discuss the storylines, including with reference to the illustrations, to explain new words. There is 'Vocabulary Support' in the back of the books. Capital letters are code for the same sounds as their lower case letters.
