Civil War and State Formation Felix Gerdes,2013-05 Liberia was the scene of two devastating civil wars since late 1989 and became widely considered a failed state. By contrast, the country is frequently described as a success story since the international professional Ellen Johnson Sirleaf assumed the presidency following democratic elections in 2005. The book investigates the political economy of civil war and democratic peace and puts the developments into historical perspective. The author argues that the civil wars did not represent the breakdown of the state but exhibited dynamics characteristic of state formation. His analysis of continuity and change in Liberia's political evolution details both political progress and persistent structural deficits of the polity. Book jacket.
