**Better Posters** Zen Faulkes,2021-05-24 Better posters mean better research. Distilling over a decade of experience from the popular Better Posters blog, Zen Faulkes will help you create a clear and informative conference poster that delivers maximum impact. Academics have used posters to share research for more than five decades, and tens of thousands of posters are presented at conferences every year. Despite the popularity of the format, no in-depth guide has been available on how to create and deliver compelling conference posters. From over-long titles, tiny text and swarms of logos, to bad font choices, chaotic colour schemes and blurry images - it's easy to leave viewers confused about your poster's message. The solution is Better Posters: a comprehensive guide to everything you need to know - from writing a title and submitting an abstract, to designing the poster and finally presenting it in the poster session. Your conference poster will be one of your first research outputs, and the poster session is your first introduction to a professional community. Making a great poster develops the skills to create publications, reports, outreach and teaching materials throughout your career. This book also has material for conference organizers on how to make a better poster session for their attendees.

**Digital Landscape Architecture Now** Nadia Amoroso,2012-10-02 Presenting work by some of the most innovative practices across the globe: inspiring ideas for a world of more beautifully designed outdoor spaces Despite its importance to place-making, urban planning, and the environment, landscape design has often played an inferior role to architecture. Typically, as little as three percent of a project's construction budget is allocated to the space that surrounds a building, but that is changing. A greater desire to blend buildings into their contexts, ecological considerations, legislation, and new definitions of "scaping" have opened up exciting possibilities. Coinciding with heightened social sensitivities, advances in material application, data-driven mapping techniques, and digital technologies and construction methods, landscape

designers are producing a new wave of work around the world, reshaping gardens, public squares, leisure areas, and industrial parks. Among the practices included in this survey are designers who have bridged modernism with newer forms (Emergent, West 8); architects whose work fuses with the earth's contours (Zaha Hadid, MVRDV); and a generation of designers only just emerging from universities. Nadia Amoroso is Professor of Landscape Architecture at the University of Toronto and has lectured at Harvard and Cornell universities.
