The Framework for Teaching Evaluation Instrument, 2013 Edition Charlotte Danielson, 2013 The framework for teaching document is an evolving instrument, but the core concepts and architecture (domains, components, and elements) have remained the same. Major concepts of the Common Core State Standards are included. For example, deep conceptual understanding, the importance of student intellectual engagement, and the precise use of language have always been at the foundation of the Framework for Teaching, but are more clearly articulated in this edition. The language has been tightened to increase ease of use and accuracy in assessment. Many of the enhancements to the Framework are located in the possible examples, rather than in the rubric language or critical attributes for each level of performance.

No More Teaching a Letter a Week Rebecca McKay, William H. Teale, 2015 Letter-a-week may be a ubiquitous approach to teaching alphabet knowledge, but that doesn't mean it's an effective one. In *No More Teaching a Letter a Week*, early literacy researcher Dr. William Teale helps us understand that alphabet knowledge is more than letter recognition, and identifies research-based principles of effective alphabet instruction, which constitutes the foundation for phonics teaching and learning. Literacy coach Rebecca McKay shows us how to bring those principles to life through purposeful practices that invite children to create an identity through print. Children can and should do more than glue beans into the shape of a B; they need to learn how letters create words that carry meaning, so that they can, and do, use print to expand their understanding of the world and themselves.
