Heritage Sites of Astronomy and Archaeoastronomy in the Context of the UNESCO World Heritage Convention

Clive L. N. Ruggles, 2012 This Thematic Study is a joint venture between ICOMOS, the advisory body to UNESCO on cultural sites, and the International Astronomical Union. It presents an overall vision on astronomical heritage, attempts to identify what constitutes outstanding universal significance to humankind in relation to astronomy, and identifies broad issues that could arise in the assessment of cultural properties relating to astronomy. This is the first Thematic Study in any field of science heritage. It is elaborated using examples of properties from around the world, including some already on the World Heritage List or national Tentative Lists. The subject matter ranges from early prehistory to modern astrophysics and space heritage, and also prominently includes dark sky issues and modern observatory sites. An e-version of the Thematic Study was published in June 2010 in time to be presented to the 2010 meeting of UNESCO's World Heritage Committee, where it was duly approved. It has been circulated officially by the WHC to all of UNESCO's National Commissions. This full-colour paperback edition with some updates, and reformatted to new ICOMOS standards, was published in 2011 and is now offered for public sale.

Pedestrian and Evacuation Dynamics Richard D. Peacock,Kuligowski Erica D.,Jason D. Averill,2011-06-29 An aging population, increasing obesity and more people with mobility impairments are bringing new challenges to the management of routine and emergency people movement in many countries. These population challenges, coupled with the innovative designs being suggested for both the built environment and other commonly used structures (e.g., transportation systems) and the increasingly complex incident scenarios of fire, terrorism, and large-scale community disasters, provide even greater challenges to population management and safety. Pedestrian and Evacuation Dynamics, an edited volume, is based on the Pedestrian and Evacuation Dynamics (PED) 5th International 2010 conference, March 8th-10th 2010, located at the National Institute of Standards and Technology, Gaithersburg, MD, USA. This volume addresses both pedestrian and evacuation dynamics and associated human behavior to provide answers for policy makers, designers, and emergency management to help solve real world problems in this rapidly developing field. Data collection, analysis, and model development of people movement and behavior during nonemergency and emergency situations will be covered as well.

The Dark Knight Trilogy Christopher Nolan,2012-08-02 Starring Christopher Bale, Michael Caine, Gary Oldman, Cillian Murphy and Morgan Freeman, the trilogy commenced with Batman Begins, which traced the origins of how Bruce Wayne took on the role of the masked crusader to fight the forces of evil. But the Batman's adversaries in the first film paled in comparison to the forces of anarchy unleashed by The Joker in the second film, The Dark Knight. Physically and psychologically depleted by his encounter with The Joker, in The Dark Knight Rises, Batman must marshal all his forces to meet the threat to Gotham City posed by the masked villain Bane. These three films form a trilogy unique in the history of cinema - and express a dark imaginative vision that reflects the uncertainties of the 21st century. Nominated for thirteen BAFTA awards and nine Oscars, the Dark Knight Trilogy starred Christian Bale, Michael Caine, Tom Hardy, Gary Oldman and Morgan Freeman. Christopher Nolan's other films include Insomnia, Memento, Inception and most recently Interstellar starring Matthew McConaughey and Anne Hathaway.

Salt, Sugar, Fat Michael Moss,2013-02-28 The No.1 New York Times Bestseller In China, for the first time, the people who weigh too much now outnumber those who weigh too little. In Mexico, the obesity rate has tripled in the past three decades. In the UK over 60 per cent of adults and 30 per cent of children are overweight, while the United States remains the most obese country in the world. We are hooked on salt, sugar and fat. These three simple ingredients are used by the major food companies to achieve the greatest allure for the lowest possible cost. Here, Pulitzer Prize-winning investigative reporter Michael Moss exposes the practices of some of the most recognisable (and profitable) companies and brands of the last half century. He takes us inside the labs where food scientists use cutting-edge technology to calculate the 'bliss point' of sugary drinks. He unearths marketing campaigns designed - in a technique adapted from the tobacco industry - to redirect concerns about the health risks of their products, and reveals how the makers of processed foods have chosen, time and again, to increase consumption and profits, while gambling with our health. Are you ready for the truth about what's in your shopping basket?
